Our mission is to provide information and education, and encourage the application of research-based knowledge in response to local, state, and national issues affecting individuals, youth, families, agricultural enterprises, and communities of Colorado.

We are part of the land-grant university system nationwide. We draw from the University’s research-based resources to strengthen community partnerships, boost the economy, engage families and youth, and enhance our quality of life.

We provide the extensive knowledge, research capabilities, and resources of this premier land grant university to Coloradans from all walks of life.

Extension staff throughout the state are dedicated to serving current and future needs of Coloradans by providing educational information and programs that safeguard health, increase livelihood, and enhance well-being.

Designed to meet the unique needs of each of Colorado’s 64 counties, Colorado State University Extension offers a wide variety of programs and educational classes.

We teach people how to apply science-based information in their daily lives in order to make informed choices about everything from personal finances and healthy living to community issues. We’re Here for You

Since 1912, Colorado State University Extension has been a trusted resource for building and strengthening Colorado communities. Extension is the front door to the university, within the Office of Engagement.

Other Office of Engagement units are:
- Colorado Water Institute
- CSU Online
- Office of Community and Economic Development

Campus partners include:
- College of Agricultural Sciences
- College of Engineering
- College of Health and Human Sciences
- College of Veterinary Medicine and Biomedical Sciences
- Warner College of Natural Resources
What We Do

Community needs drive our work. Statewide engagement fuels our collaboration. Our educational programs are carried out through interdisciplinary groups with interrelated efforts, to bring about statewide engagement efforts, based on community needs. We foster a direct connection between Extension agents and campus and field-based subject matter specialists in five CSU colleges, to meet locally based, county, and regional needs of Coloradans.

Our educational programs are available through a variety of methods including web-based platforms, social media, traditional group meetings, one-on-one contacts, and available through a variety of methods including web-based platforms. Our educational programs are delivered by Extension agents, specialists and Colorado Master Gardeners, to meet locally based, county, and regional needs of Coloradans.

Our work is assessing the economic impact of the agriculture, tourism, and food system is evolving. The interface between our natural resources and amenities and the agriculture, tourism, and food system is evolving.

Engaging communities and the agricultural and food system is evolving. The interface between our natural resources and amenities and the agriculture, tourism, and food system is evolving.

Nutrition, Food Safety & Health

Promoting education and adoption of nutritious food choices and safe food handling practices. We work with multiple government agencies, community, volunteers, and educational programming. Our work includes free food choices and public health messages on our house food choice and public health messages on our house food choice and public health messages on our house food choice and public health messages on our house food choice.

Our collaborative efforts explore how urban and suburban landscapes impact our food systems, and how framing food choices and systems can be advanced. We are developing a series of short videos on urban and suburban landscapes impact our food systems, and how framing food choices and systems can be advanced.
