Section 4 No. 4.5

Custom Rates for Colorado Farms & Ranches in 2005

Agricultural operators may not own all the machinery, equipment, and land necessary to perform every farm and ranch operation. In some cases, labor is not available, and in others, owning the equipment is simply too costly for relatively small jobs. Therefore, many farms and ranches use custom operators, machinery rental, and/or pasture leases.

Colorado State University Cooperative Extension conducts an annual survey of agricultural producers, land owners and managers, lenders, agricultural consultants, machine operators, and Cooperative Extension agents throughout Colorado. The results of this survey are a report of "custom rates" charged in the previous year for various crop and livestock operations.

Reported charges were used to determine a range of custom rate charges. "Most common" refers to the custom rate reported most often. "n/a" indicates that no information was available for that particular activity or the information was reported by a single source.

The rates charged do not necessarily measure the full economic cost of performing the work specified. Some custom operators may charge only for the costs of fuel and labor. Others may charge for all costs including depreciation on equipment and allowance for risk. Field conditions, such as size, terrain, and location, may also account for variations in rates charged.

The rates reported in this report are not recommended rates, but simply indicate rates currently being charged throughout Colorado. They represent a variety of working conditions, machine and equipment sizes, and farm and ranch operations. The reported rates reflect only the survey results and should be used only as a guide.

Custom rates in 2005 generally increased over those charged in 2004. The primary reason for the increase was the higher prices operators paid for fuel. In some cases, custom operators and farmers reported that a "fuel charge" was charged in addition to the reported custom rate.

The authors would like to thank everyone who contributed to the custom rates survey and this report.
