A NOTE FROM US

The Boulder Star continues to be a symbol of unity, hope and resilience for our community in the face of difficult times like these. We hope the Boulder Star will provide comfort to all who gaze upon it in this moment of shared grief. Credit: Boulder Office of Emergency Management.

It's difficult to put into words the profoundly life-changing experience of surviving a wildfire. After the flames are out, the road to recovery is about more than filing claims, calls with agencies, clean-up, and what will feel like a never-ending to-do list. It's about the emotional healing of accepting what was lost, forgiving yourself for what you wish you would have done, and remember to have faith again in the future ahead. The smiles will eventually outweigh the tears — you'll emerge stronger and be amazed by your resilience.

No two recovery journeys are the same, and each present unique circumstances. CSU Extension has gathered a variety of resources based on insights from subject matter experts and survivors to provide guidance on the road to recovery. We hope you find this toolkit useful as you embark on the journey ahead.

ACKNOWLEDGEMENTS

This toolkit would not have been possible without contributions from experts at Colorado State University Extension, Colorado State Forest Service, CSU's College of Veterinary Medicine and Biomedical Sciences and Warner College of Natural Resources. We would like to extend a special thank you to landowners impacted by the Pine Gulch and Cameron Peak Fires for sharing their recovery journey. Thank you to all who contributed.

ACRONYMS

Listed below are some of the common acronyms and their meaning that are used throughout this guidebook and throughout post-fire recovery.

| Acronym | Definition |
|----------------|--|
| BAER | Burned Area Emergency Response |
| BCPH | Boulder County Public Health |
| BLM | Bureau of Land Management |
| BOEM | Boulder Office of Emergency Management / Boulder OEM |
| CDA | Colorado Department of Agriculture |
| CDPHE | Colorado Department of Health and Environment |
| CSFS | Colorado State Forest Service |
| CSU | Colorado State University |
| DOI | Division of Insurance |
| DOLA | Division of Local Affairs |
| DOR | Department of Revenue |
| DORA | Department of Regulatory Agencies |
| EPA | Environmental Protection Agency |
| EWP | Emergency Watershed Protection |
| FEMA | Federal Emergency Management Agency |
| FSA | Farm Service Agency |
| GIS | Geographic Information Systems |
| IRS | Internal Revenue Service |
| NAMI | National Alliance for Mental Illness |
| NOAA | National Oceanic and Atmospheric Administration |
| NRCS | Natural Resources Conservation Service |
| NWR | NOAA Weather Radio |
| NWS | National Weather Service |
| RMIIA | Rocky Mountain Insurance Information Association |
| SRFSN | Southern Rockies Fire Science Network |
| USDA | United States Department of Agriculture |
| USFS | United States Forest Service |
| WAVE | Watershed Assessment and Vulnerability Evaluation |

IMMEDIATE SAFETY

LET OTHERS KNOW YOU'RE SAFE

Whether it's through phone or a designated meeting place, notify family or friends that you're safe.

CHECK IN AT BOULDER COUNTY'S EVACUATION CENTERS

Stopping at the evacuation center is another good way to let others know you're safe and could prevent firefighters from risking their lives looking for you and your family. It's also a way to connect with law enforcement, local and county administration, community organizations, and other survivors that may be there. It gives some survivors solace to know that there are people and resources ready to assist. Please respect COVID protocols and mask mandates. It is important that our communities maintain our health during this challenging time. View a list of evacuation centers at [BoulderOEM.com](https://www.bouldercounty.gov/evacuation-centers).

WAIT UNTIL AUTHORITIES SAY IT'S SAFE TO RETURN

Returning to the scene puts you and others in danger, as well as obstructing firefighting efforts. There is significant danger from damaged trees, downed powerlines and other hazards that may be present on or near your property. Additionally, the behavior of fires is always changing and if conditions change, no one may know if you're there. People can be evacuated more than once in the same fire event; repeated returns and evacuations present challenges for emergency responders.

KNOW WHEN TO CALL 911

If you feel that you are in immediate danger, call 911. Fire updates and all resources (including lost pets) are at [BoulderOEM.com](https://www.bouldercounty.gov). For fire status updates, call (303) 413-7730 or [sign up for text or email emergency alerts from Boulder County Sheriff's Office](https://www.bouldercounty.gov/emergency-alerts). During an active fire, the InciWeb Incident Information System will have details and fire maps that are regularly updated. This information is often more reliable than local news because it is managed by a fire communication specialist.

LIMIT WILDFIRE SMOKE EXPOSURE

Wildfire smoke harms healthy people, those with pre-existing health conditions, livestock, and pets. To reduce exposure to smoke, keep an eye on air quality reports from Boulder County Public Health or EPA AirNow.

KEEP UP WITH CURRENT WEATHER CONDITIONS

The NWS Forecast Office in Boulder provides active alerts on weather in the region. This office also operates transmitters for NOAA Weather Radios for the area by providing 24/7 information on watches, warnings and advisories.

PHONE CALL CHECKLIST

Below is a suggested list of calls to make after evacuation based on what best fits your situation. Don't forget to take notes and feel free to add your own calls or to-dos on the right.

Insurance Company

Give your insurance company as much information as you have even if you don't know the outcome of your home and land. Make sure they know the best way to reach you and you, them. This may be a good time to inquire about your policy and the next steps in the claims process. See the *Insurance, Finance, and Important Documents* section for a list of frequently asked questions for insurance representatives that you may find useful.

Mortgage Company

If you have a mortgage on your home or land, you'll want to contact your lender's loss mitigation department and explain what has happened. As with the insurance company call, make sure you know the best way to reach each other as the situation progresses.

Banks & Credit Card Companies

Call your bank and credit card companies to let them know what's going on. As you're buying replacement items that your bank or credit card company thinks you already own, it may trigger a fraud alert on your account(s).

Post Office

With your mail, you have a few different options depending on what works best for you. You can request a mail hold for USPS to hold your mail for up to 30 days at usps.com or by calling **(800) 275-8777**. After 30 days you can have your mail forwarded to another address or you can get a P.O. Box.

Doctor and/or Health Insurance

If any medications or supplies were left behind that will need to be replaced immediately, call to see if you are able to get replacements ASAP.

Service Providers (utilities, electricity, gas, water, garbage, internet, etc.)

Notify your home service providers on the situation so that service can be paused or shut off for the time being. Double check to make sure that your automatic payments are also paused so you aren't paying for services you won't use for a while.

MENTAL HEALTH AND SELF CARE

Disasters typically bring about feelings such as fear, shock, disbelief, grief, anger, and feelings of guilt. Memory loss, anxiety, depression, and flashbacks are all common occurrences. Many people have trouble concentrating, thinking clearly, or sleeping. Linda Masterson, author of [*Surviving Wildfire*](#), and 2011 Crystal Fire survivor shares tips from experts and her own experience on taking care of yourself and your family during disaster recovery.

It's okay to not be okay

Allow yourself to recognize your own feelings and be patient with the changes in your emotional state. This is a difficult time, and you don't have to put on an about-face. No one is perfectly fine after experiencing a wildfire.

Rest and sleep

Sleep deprivation can interfere with your ability to function and make decisions. Try to get as much rest and sleep as you can. Relaxation techniques such as meditation or deep breathing may help if you have ongoing difficulties with sleep. Also avoid working on your claim or watching the news right before bed.

Arrange professional counseling

The Red Cross, Colorado 211, or your primary care doctor can connect you and your family to professionals who specialize in disaster related stress. Most health insurance plans, or employee assistance programs can help cover mental health or psychiatric care.

Engage in healthy behaviors

Eating well and getting some exercise will help you feel better and make your brain work better. Staying hydrated is also important as dehydration can worsen symptoms you may already be experiencing. Also limit or avoid alcohol as it can interfere with your sleep and ability to cope.

Stay connected

Social support is crucial to disaster recovery. Staying connected to your family, friends, neighbors, fellow survivors, and any other support network is helpful as you work through recovery.

Establish or reestablish routines

This can include eating meals at set times, sleeping and waking on a set schedule, or sticking to a workout routine. Include some positive routines, such as taking a walk or reading a good book, to give yourself something to look forward to during these trying times.

Monitor and limit media exposure

During disasters, the non-stop TV, radio, internet, and social media coverage can make things worse. Unfortunately, all of the news may not be completely accurate, which can add to your stress. As compelled as you may feel to follow all of it, try to stick to the daily official briefings.

“

I WAS SUPPOSED TO BE A ROCK, BUT INSIDE I WAS CRUMBLING.

When I reached out, I was seconds away from ending my life. Financially, things on our ranch were falling apart—and I felt like a failure. I didn't want my problems to burden anyone else, so I buried 'em inside. And that's what almost buried me. Thankfully, I picked up my phone and called Colorado Crisis Services. I was able to finally get out everything I'd been holding inside, and I realized that trying to be a rock of strength for everyone else had actually caused me to start crumbling inside.

No matter what you're going through, you don't have to go through it alone.

“Whatever the news, no matter how bad or good it may be, there can be no next steps until you know what you’re dealing with.” - Linda Masterson, Surviving Wildfire

Although the flames are out, unfortunately, there are dangers that remain. Some hazards that may exist include flash flooding, structural damage, downed powerlines, unstable roads, weakened trees, hot spots, or wildlife predators that have moved into the area. Survivors recommend making an initial trip to assess the extent of damage, post-fire hazards, and plan for restoration tasks that need to be accomplished first, before beginning clean-up or returning home.

Regardless of the extent of the fire damage to your home or land, returning after the fire will be an emotional experience. For the first viewing and initial assessment, you’ll want to make sure to bring a camera, notepad, and box of Kleenex. The first steps to recovery will start with assessing and documenting your losses. **Be sure to take plenty of pictures and notes before moving anything around.** If your adjustor is coming with you, take good notes of your conversation.

Also wait to bring back pets and livestock from their evacuation location until you know the extent of damage and hazards that may exist such as, downed fences, hot spots, or predators that may have moved into the area. The following pages include re-entry safety tips and a post-fire supply list.

SAFETY TIPS FOR RETURNING

When you are given approval by a fire authority to return to your property, keep the following safety tips in mind as you re-enter.

KEEP AN EYE (OR EAR) ON THE WEATHER

When rain falls over a burned area upstream of your location after a wildfire, flash flooding can occur. Avoid burned areas, storm drains and natural drainages. Keep a NOAA weather radio handy for emergency updates, weather, and news reports.

USE CAUTION AND GOOD JUDGMENT

Smoke, sparks, ash pits, hot spots, or hidden embers should be avoided. Deeply charred or smoking trees, poles, and wires on the ground are dangerous. If another fire or emergency occurs while assessing damage, call 911.

DRIVING & WALKING THE PROPERTY

Watch for downed or unstable trees, brush, rocks, and utility poles. Roads may also have debris or damage. Take a walk around the property to find hotspots and downed fences to help keep pets and livestock safe.

ARRIVING AT YOUR HOME

Prior to returning, check in with your local fire authority to make sure it's safe to return. Be wary of structural instability and hot embers. Check gutters, roofs, overhangs, decks, and wood/debris piles for embers. Look for any hot embers in attics, crawl spaces, or vents.

CHECK FOR UTILITY DAMAGE

Before using any utilities, lines, meters, or propane tanks should be inspected by a professional for damage. Call your service provider to see if their technicians have already come to your property to inspect your utilities or see if an appointment needs to be scheduled.

ASSESSING YOUR WATER & SEPTIC SYSTEM

Before using a private well, it should be inspected for damage. Depending on the damage, a well technician may be needed. The fire may have contaminated water, so test it before drinking it. Water testing kits are available through Boulder County Public Health. In certain situations, municipal water may not be safe to drink. Follow [CDC instructions](#) to boil water.

The folder is resting on a dark surface, possibly a desk. The lighting is soft, highlighting the texture of the paper and the edges of the folder.

INSURANCE, FINANCE, & IMPORTANT DOCUMENTS

Destructive wildfires can be financially stressful, and in some cases, devastating. Having good records organized and stored in a safe location (e.g., safe deposit boxes, digital backups) will make insurance claims, taxes and filing for financial assistance go smoother down the road. The resources on the following pages can help you work with insurance, finance and funding options, and replace important documents. Here are a few more financial pointers to keep in mind.

- Before beginning any clean-up, restoration, or debris removal, contact your insurance representative to review your policy coverages, set up a timeline for meeting with your adjustor, and determining the best way to document losses. For help finding your insurer or agent, reach out to the Colorado Division of Insurance at **(303) 894-7490** or visit doi.colorado.gov.
- Take several photos from multiple angles or videos with narration to describe the damage and previous features of your home, personal property and land. This will help with insurance claims and applications for assistance programs.
- Survivors recommend double checking your phone for old photos to help give you and the insurance company an idea of what possessions have been lost or damaged. For example, if you have a photo from a holiday gathering in your living room last year, you may be able to see items in the background that you can add to your home inventory.
- Keeping track of your receipts from restoration and recovery projects will be important as you work through your insurance claim or apply for assistance programs. Also, look through your email account for any pre-fire purchases to help with valuing items.
- Flood preparedness is a top priority following a wildfire; if possible, flood insurance should be purchased. Visit www.floodsmart.gov to learn more about flood insurance.

REPLACING IMPORTANT DOCUMENTS

If you were unable to make it out of your house with important personal documents, the table below provides information on how to replace them.

| Document Type | Contact Information |
|---|---|
| Colorado Driver's License, Vehicle Registration, or Titles | Visit Colorado's DMV online portal at mydmv.colorado.gov or call (303) 205-5600. |
| Bank Checks, ATM, or Debit Cards | Contact your financial institution or the FDIC at (877) 275-3342 or www.fdic.gov . |
| Credit Cards | Contact the issuing institution: <ul style="list-style-type: none"> American Express: (800) 528-4800 or www.americanexpress.com Discover: (800) 347-2683 or www.discover.com Mastercard: (800) 307-7309 or www.mastercard.us Visa: (800) 847-2911 or usa.visa.com |
| Social Security Cards | Visit www.ssa.gov or call (800) 772-1213 |
| Birth or Death Certificates | <ul style="list-style-type: none"> For Colorado-issued birth or death certificates, contact CDPHE Vital Records by calling (303) 692-2200 or visit cdphe.colorado.gov/vitalrecords. For out-of-state issued birth or death certificates, visit www.cdc.gov/nchs/w2w/index.htm For birth or death certificates issued abroad, visit travel.state.gov/content/travel/en/records-and-authentications.html |
| Marriage or Divorce Records | Copies of marriage and divorce records are available from the county that issued them. For Boulder County records, contact (303) 441-3525 or visit https://www.bouldercounty.org/records/ . |
| Passports | Contact the U.S. State Department at (877) 487-2778 or visit travel.state.gov/content/travel/en/passports/have-passport/lost-stolen.htm . |
| Income Tax Records | Find your local IRS office at www.irs.gov/help/contact-my-local-office-in-colorado or call the Denver IRS office at (303) 446-1675. |
| Military Records | Contact the National Archives and Records Administration at (866) 272-6272 or visit www.archives.gov/contact . |
| For contact information on replacing other important personal documents, check out: <ul style="list-style-type: none"> Replacing Important Documents in Colorado (CSU Extension): bit.ly/COimportantdocs Checklist of Important Legal Documents (FDIC): bit.ly/FDICimportantdocschecklist Replace Your Vital Records (USA.gov): www.usa.gov/replace-vital-documents | |

CLEANING & DEBRIS MANAGEMENT

After confirming your insurance coverage, scheduling a time to meet with your adjuster, and recording any damages or losses, you may be ready to start the clean-up process. Whether damaged or destroyed, you'll want to be familiar with safe clean-up, disposal, and debris management practices. Your needs may vary depending on the extent of the damage and whether you hire contractors or do it yourself. The following pages include resources for the most common clean-up, disposal, and debris management issues that may arise.

Tom Brigham, Pine Gulch Fire survivor, sifts through rubble of his property. Photo credit: Channing Bice, CSU Student

TIPS FOR SAFELY CLEANING FIRE ASH

Debris left behind on Tom Brigham's property from the Pine Gulch Fire.
Photo credit: Kamie Long, CSFS

Resource adapted from Mesa County Sheriff's Office.

Ash can be deposited on indoor and outdoor surfaces during and after wildfires and contains trace amounts of cancer-causing chemicals. The ash from trees and vegetation is typically non-toxic; ash from constructions can be contaminated with mercury, asbestos, and lead, making it toxic. Fire ash can irritate skin, especially sensitive skin. Inhaled ash can induce nasal and throat irritation, as well as coughing. Asthma episodes can be triggered by airborne ash. As you begin the clean-up process, keep the following health and safety tips in mind.

- Keep children, pets, and livestock out of burn debris or ash sites.
- Well-fitting N-95 or P-100 masks can help protect during cleanup by blocking more ash particle inhalation than dust or surgical masks.
- When cleaning ash, wear gloves, long-sleeved shirts, and long pants to avoid skin contact. If you, a family member, or pet comes into contact with ash, wash it off as quickly as possible.
- As much as possible, avoid stirring or shifting ash. Before lightly sweeping, mist indoor and outdoor hard surfaces to keep down dust. Follow up with wet mopping or a damp cloth.
- On lightly dusted indoor and outdoor surfaces a damp cloth or wet mop may be all that is needed.
- If available, utilize HEPA filter vacuums instead of shop vacuums or other non-HEPA vacuums. HEPA filter vacuums will filter out minute particles rather than blowing them into the air.
- Food, beverages, or medications that have been exposed to burn debris or ash should not be consumed.
- If you have a vegetable garden or fruit trees, thoroughly wash the produce before eating.
- Clean all utensils and dishware before use by washing them in a strong detergent solution and then soaking them in a bleach solution of one teaspoon of bleach per quart of water for 15 minutes.

CLEANING RESOURCES

Check out the following resources for more information on safe and effective after wildfire clean-up in your home.

Cleaning Up After a Fire Disaster

Utah State University Extension

Visit bit.ly/USUcleanafterfire for more information on cleaning smoke damage, fire retardant, soot, ash, both indoors and outdoors.

Cleaning Up and Removing Smoke Odor

American Red Cross

Check out bit.ly/cleaningsmokeodor for more detailed indoor clean-up advice and cleaning mixtures for removing smoke odor from clothes, walls, and surfaces.

Returning to Your Home Kitchen After Wildfire

CSU Extension

Visit the [CSU Extension website](https://www.csuextension.org/) for resources on supplies and considerations for cleaning refrigerators and freezers, as well as information on food safety.

Food Safety, Disaster Recovery Guide

Colorado Department of Public Health and Environment

Visit bit.ly/CDPHEfoodsafety for more detailed information on preventing foodborne illness, food safety after power loss and food exposure to wildfire smoke.

DEBRIS AND DISPOSAL RESOURCES

A good place to start is by checking in with your local landfill restrictions for disposing fire debris, hazardous materials, carcasses, and other waste. Boulder County Waste Services can be contacted by visiting <https://www.bouldercounty.org/environment/sustainability/waste-services/>.

Debris Cleanup, Disaster Recovery Guide

Colorado Department of Public Health and Environment

Visit bit.ly/CDPHEdebriscleanup for more information on the safe cleanup of debris, ash, hazardous materials, and emergency livestock disposal.

Asbestos and Natural Disasters Guide

The Mesothelioma Center

Check out asbestos.com/asbestos/natural-disasters for information about materials containing asbestos and how to minimize your exposure after a wildfire.

Animal Carcass Disposal

Colorado Department of Public Health and Environment

This resource has more information on safe carcass disposal and staying in compliance with disposal regulations. Check it out at bit.ly/CDPHEanimalcarcass.

Livestock Mortality Composting Guide

Montana State University Extension

Visit bit.ly/livestockmortality for more information on disposal for large and small operations in semi-arid western regions.

CARING FOR ANIMALS AFTER WILDFIRE

When it is safe to bring your animals back to your property after disaster, remember to handle them calmly and carefully. They will likely be stressed or confused and may react with unexpected behavior. Keep the following tips in mind:

- When it is safe to do so, check pens, barns, and sheds for damage, and check pastures for debris. Move animals to safe areas.
- Check pets and livestock for injury and tend to minor injuries promptly. For animals with serious injuries or long-term behavioral issues, contact a veterinarian for help.
- Make sure your animals have plenty of fresh food and water. Cover their food, hay, and water to keep ash and other contaminants out.
- Smoke, while irritating to humans, can be harmful to animals. If you can see or feel the effects of smoke, take precautions to protect your pets and livestock from smoke exposure.
- Animals can become disoriented easily after a wildfire and get lost. Be sure that pets and livestock are wearing their identifiers (collars with IDs, microchips, tags, brands, etc.) with your name, address, and phone number.
- If your pet is missing, file a [lost and found report](#) with the Office of Emergency Management or contact [Boulder County Animal Control](#).
- For animals needing to be rescued or for help with carcass disposal, call your county's emergency management services or county extension office.
- Document and report all livestock and poultry losses immediately to your county Farm Service Agency (FSA).
- After wildfire, be sure your livestock are pastured somewhere safe from post-fire flooding, if possible.

LANDSCAPE RECOVERY

Following a destructive wildfire, landowners will need to assess the surrounding landscape and determine how best to affect restorative treatments. Immediate concern should be for the stabilization of soils to help prevent or mitigate flooding, erosion, mudslides, and other hazards. Colorado's diverse topography, paired with burn severity of the area can make each landscape treatment plan vary. The following pages contain landscape recovery resources for soil erosion, seeding, trees, and key contacts. Local CSU Extension agents and Natural Resources Conservation Services (NRCS) staff can also help provide recommendations.

POST-FIRE FLOODING

Wildfires have increased the risk of flooding in many areas of Colorado in recent years. The dramatic changes in landscape and ground conditions after wildfires increases the risk of flooding during heavy rains. Burned landscape is unable to absorb rain as effectively as it did before the fire, resulting in runoff conditions like those found in parking lots. Flooding is most common during the summer and early fall, when thunderstorms develop during the monsoon season. Rainfall over the burned area collects in streams causing flash floods carrying downed trees, boulders, gravel, and other debris. The resources on the following pages will help landowners downstream understand how to reduce risk and prepare for flooding.

STAY CONNECTED

The Marshall Fire resulted in hundreds of homes lost and/or damaged. Every loss and the emotions that come with it matter. It's okay to grieve life prior to the wildfire, mourn what has been lost, feel overwhelmed by the work ahead, and the multitude of other feelings you may experience. Like a wildflower, you too will grow again in new ways, you may not have thought possible.

Throughout the development of this guidebook, one theme held constant. Amidst the heartbreak, we found ourselves captivated by the resilience of survivors. Although it may feel like all is lost, your connections with family, friends, and the community, will prove to be the most valuable asset to your recovery.

Whether you've known CSU Extension and our partners for a while or we've just connected, we hope to stay in touch along the way. Don't hesitate to contact us if we can be of further assistance or you're interested in getting involved in community recovery efforts.

You've got this.

GUIDEBOOK

CONTRIBUTORS

The contributors listed below were able to bring a wide range of perspectives including, landowners that experienced post-fire impacts, extension agents that have assisted with recovery efforts, and subject-matter experts on emergency management, forestry, fire science, animal care, and communication. We hope you find this toolkit useful, and we welcome any feedback you may have so that we can continue to improve it.

- Channing Bice, Public Communication & Technology PhD Student, Department of Journalism & Media Communication, CSU
- Susan Carter, Horticulture and Natural Resources Agent
CSU Extension: Tri-River Area
- Todd Hagenbuch, County Director and Agriculture Agent, CSU
Extension: Routt County
- Doug Dean, Area Director and Livestock & Range Agent, CSU
Extension: Tri-River Area
- Carolina Manriquez, Northwest Area Forester, Colorado State Forest Service
- Ragan Adams, Veterinary Extension Specialist, Department of Clinical Sciences, CSU
- Gloria Edwards, Southern Rockies Fire Science Network Program Coordinator, Warner College of Natural Resources, CSU
- Todd Hollenbeck, Deputy County Manager, Mesa County Colorado
- Tom Brigham, Landowner and Pine Gulch Fire Survivor, Garfield County, Colorado
- Malli Larson, Landowner and Pine Gulch Fire Survivor, Garfield County, Colorado
- Justin Wilson, Landowner and Cameron Peak Fire Survivor, Larimer County, Colorado
- Ellis Thompson-Ellis, Community Outreach Specialist, Grand Junction Fire Department
- Kamie Long, District Forester, Colorado State Forest Service
- Olivia Clark, Extension Director and Agent, CSU Extension: Grand County
- Karen Crumbaker, Agriculture & Natural Resources Agent, CSU
Extension: Larimer County
- Laura Larson, County Director, CSU Extension: Boulder County
- Sarah Schweig, County Director, CSU Extension: Broomfield County
